

Bobby's dynamic personality led to a very engaging presentation with our 6-12th grade students. Numerous questions from the audience along with the clapping and cheering occurred throughout his presentation. Middle school students flocked to the stage after the assembly to meet him and to get their picture with him. We now have students requesting to visit with him during school tomorrow and these are primarily our extremely hard to reach, high-risk population of students that we as a school have not been able to connect with on a personal level. What a blessing to have East Central Behavior Health provide this incredible resource to Sioux Valley to help our students reach their full potential! We need more people like Bobby Jones in our schools on a daily basis to help advocate for today's youth!

Belinda L. Miller, Secondary Principal
Sioux Valley School District
